

HEALTHY HOMES & GARDENS

ROHS & CERAMICS 5 SAMPLES FOR \$132

We offer a quick non-destructive method for testing your household objects.

This service includes:

- *Test for heavy contaminants in your objects.*
- *Receive a full report of findings.*

Today, items purchased by the public are required to have safe levels of hazardous substances such as bromine, cadmium, mercury and lead before they can be sold.

Older objects such as furniture, ceramics and antique toys may have been produced before these restrictions applied.

If in doubt our tests will provide you peace of mind.

Book online now or call 08 9321 2830

We are a sister company with
Portable Spectral Services
